Dear New Prospect,

Thank you for your interest in our PowerTrader Platform! (Currenex)

With FXDD's PowerTrader, professionals can access one of the deepest liquidity pools in the marketplace. PowerTrader utilizes straight-thru-processing (STP) to connect you to a large number of global banks and ECN systems in one easy-to-use trading platform. PowerTrader provides pricing with no dealing desk intervention; the live, executable streaming prices come directly from major liquidity providers.

PowerTrader is designed to be used by active traders who require a larger depth of market and ticket size (typical trades range from ½ million to 10 million per ticket).

Please note: We here at FXDD try to qualify clients on the platform that will best suit their trading needs.
